                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         A4443

basic helix-loop-helix transcription repressor H - fruit fly (Drosophila virilis)
C;Species: Drosophila virilis
C;Species: Drosophila virilis
C;Accession: A4443

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ଚ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   RESULT 25
T09084
phosphatidylinositol 3-kinase - Chlamydomonas reinhardtii (fragment)
C;Species: Chlamydomonas reinhardtii
C;Species: Chlamydomonas reinhardtii
C;Decies: Chlamydomonas reinhardtii
C;Decies: 11-Jun-1999 #sequence_revision 11-Jun-1999 #text_change 09-Jul-2004
C;Speciession: T09084

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Proc. (Natl. Acad. Sci. U.S.A. 78:2825-2829(1981).
-!- FUNCTION: Antifreeze proteins lower the blood freezing point.
-!- SIMILARITY: Belongs to the type-I AFP family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ö

-!- FUNCTION: Antifreeze proteins lower the blood freezing point.
-!- SIMILARITY: Belongs to the type-I AFP family.
                                                                                                                                                                                                                                                                                                                           Gaps

"Unusual core histones specifically expressed in male gametic cells of
Lilium longiflorum.";
Chromosoma 108:491-500(2000).
-!- SUBUNIT: The nucleosome is an octamer containing two molecules
each of H2A, H2B, H3 and H4. The octamer wraps approximately 146
bp of DNA (By similarity).
-!- SUBCELLULAR LOCATION: Nuclear (By similarity).
                                                                                                                                                      Eukaryota, Viridiplantae, Streptophyta, Embryophyta, Tracheophyta,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             binding to the B box (5 -CANNTG-31).
-!- SUBUNIT: Efficient DNA binding requires dimerization with another bHLH protein. Forms a heterodimer with E12/E47.
-!- SUBCELLULAR LOCATION: Nucleus (Probable).
-!- SUBLIARITY: Contains 1 basic helix-loop-helix (bHLH) domain.
                                                                                                                                                                                                                                                                            PSD553; 098030; 01-02T-1996, integrated into UniProtKB/Swiss-Prot. 02-MAY-2002, sequence version 2. ACHAR-2006, entry version 46. Achaeve-scute homolog 1 (HASH1).

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
